PROFESSIONAL SUMMARY

High-achieving Computer Science graduate from Qassim University (GPA: 4.59/5, First Class Honors) with strong foundations in software engineering, RESTful API development, and Software Quality Assurance. Skilled in Java,.NET (C#), and Python, with certified competencies in Software Testing and RESTful APIs. Dedicated to building reliable, high-quality software solutions and backend architectures.

CERTIFICATIONS

- **Introduction to Software Testing** – Simplilearn Skillup
- **Introduction to API and RESTful API** – Great Learning

TECHNICAL SKILLS

Core Languages:	Java, C# (.NET), Python, Dart, SQL, HTML5, CSS3
Frameworks & APIs:	RESTful APIs,.NET Core, Spring Boot basics, Flutter, Django
Testing & QA:	Software Testing (Manual & Unit Testing), QA Principles, Code Debugging
Cloud & Databases:	Relational Databases (SQL), Google Cloud Firestore, Firebase
Tools & Version Control:	Git, GitHub, Render Deployment, Bash/Terminal

EDUCATION

Qassim University *Graduation: June 2026*

Bachelor of Computer Science

- **GPA:** 4.59 / 5.00 (Excellent with First Class Honors)
- **Core Coursework:** Software Engineering, Object-Oriented Programming (Java/C#), Web Technologies, Software Testing & Verification, Database Systems.

PROJECTS & PRACTICAL EXPERIENCE

Graduation Project: Dhallah (AI-Powered Mobile Application) *Jan 2026 - May 2026*

Mobile & API Developer

- Developed backend scoring services in **Python** and integrated them with cloud services via **RESTful API** connections.
- Built cross-platform mobile user interfaces using **Flutter** and integrated Google Cloud Firestore for real-time data synchronization.
- Conducted API endpoint testing and error logging to ensure smooth data transfer and system reliability across Render deployments.

Academic Labs & Course Projects (Qassim University) *2022 - 2026*

Computer Science Student / Developer

- Implemented Object-Oriented Programming (OOP) concepts and logic using **Java** and **.NET (C#)** through hands-on university coursework and lab assignments.
- Designed and queried relational database schemas using **SQL** and verified software functionality through systematic testing and debugging.

LANGUAGES

- **Arabic:** Native | **English:** Professional Working Proficiency
